FIELDS OF INTEREST	Health Economics, Labor Economics, Public Economics	
CURRENT POSITION	<b>Bowdoin College</b> Visiting Assistant Professor	Brunswick, Maine July 2025 - June 2026
EDUCATION	<b>University of California, Riverside</b> Ph.D., Economics <i>Committee: Michael Bates (Chair), Bree Lang, Ajin Lee</i>	Riverside, California June 2025
	<b>Chung-Ang University</b> M.A., Economics M.A. coursework, Linguistics B.A., Economics and English Language and Literature <i>magna cum laude</i>	Seoul, South Korea August 2018 September 2015-June 2016 January 2013
AWARDS AND HONORS	Distinguished Teaching Award (UC Riverside) Dissertation Completion Fellowship Award (UC Riverside) Outstanding Teaching Assistant Award (UC Riverside) Dean's Distinguished Fellowship (UC Riverside) Scholarship for an Outstanding Performance (Chung-Ang University)	2025 Spring 2025 2021, 2025 2018-2019 Fall 2008
WORKING PAPERS	<b>Policy, Substance Abuse Treatment Access, and Overdose Deaths (JMP)</b> Examines the supply-side effects of the Affordable Care Act (ACA) on residential substance abuse treatment (RSAT) facilities using county-level data from 2004 to 2016. Employing difference-in-differences and event study methods, the paper finds that RSAT facilities per 100,000 population increased by 24 percent in counties with low pre-ACA saturation and by 15 percent in Medicaid expansion states. This expansion was largely concentrated in areas with existing providers and accompanied by substitution effects, including declines in outpatient treatment availability. The analysis finds no evidence of reductions in fatal or nonfatal overdose outcomes, suggesting limited benefit of the RSAT expansion. The full paper is available <a href="#">here</a> .	
	<b>Spillover Effects of Malpractice Disclosures on Physician Relocation</b> Examines whether public malpractice disclosures lead to peer relocation within practice groups by linking data from the Medical Board of California and National Provider Identifier files. The full paper is available <a href="#">here</a> .	
	<b>The Effect of Building Affordable Housing on Student Mobility</b> Examines whether the Low-Income Housing Tax Credit program improves residential stability for families with school-age children using student data from North Carolina. Summary of findings available <a href="#">here</a> .
